

Knowledge is of no value unless you put it into practice

~ Anton Chekhov

As a software engineer and ML enthusiast, I often come across insightful blogs that provide valuable knowledge and practical insights. This post serves as my personal repository of such resources, organized by topics for easy reference.

Generative AI

1. [Common pitfalls when building generative AI applications](#) by Chip Huyen

This is a living document that I'll continue to update as I discover more valuable resources. Each blog has been selected based on its depth, practical applicability, and clear explanations.

Feel free to suggest any additions or share your thoughts on these resources!
